

FreshMart Retail Solutions

Sales Performance Dashboard — Insights Report

Data Period: 2014 – 2017 | Prepared for: Management Review | Analyst: Sarah Mitchell

Executive Summary

This report summarizes performance across FreshMart's sales dataset covering 9,994 transactions from 2014 to 2017. Overall revenue reached **\$2.30M** with **\$286K** in total profit, a blended profit margin of **12.5%**. Revenue grew every year, with a strong **+20.4%** jump in 2017 versus 2016. Technology and Office Supplies are the most profitable categories, while Furniture — particularly Tables and Bookcases — is dragging overall margin down due to heavy discounting. The West and East regions lead in both revenue and profit, and Consumer is the largest customer segment by a wide margin.

TOTAL REVENUE	TOTAL PROFIT	TOTAL ORDERS
\$2.30M	\$286K	5,009
AVG. ORDER VALUE	PROFIT MARGIN	ACTIVE CUSTOMERS
\$458.61	12.5%	793

1. Revenue & Growth Trend

Revenue climbed from \$484K in 2014 to \$733K in 2017 — a cumulative increase of 51%. Growth accelerated in the most recent year, with 2017 revenue up 20.4% and profit up 14.2% over 2016. Order volume followed the same upward path, reaching 1,687 orders in 2017 (from 969 in 2014), confirming that growth is being driven by rising order volume rather than one-off large transactions.

Year	Revenue	Profit	Orders
2014	\$484,247	\$49,544	969
2015	\$470,533	\$61,619	1,038
2016	\$609,206	\$81,795	1,315
2017	\$733,215	\$93,439	1,687

2. Category & Product Performance

Technology is the top revenue driver (\$836K) and also the most profitable category (17.4% margin). Office Supplies contributes similar profitability (17.0% margin) on slightly lower revenue. Furniture generates comparable revenue (\$742K) but yields only a 2.5% margin — the weakest of the three — signaling a pricing or discounting problem rather than a demand problem.

Drilling into sub-categories explains the Furniture shortfall: **Tables (-\$17.7K)** and **Bookcases (-\$3.5K)** are outright loss-making, alongside a small loss in Supplies. Across the full catalog, 301 of 1,850 distinct products (about 16%) are unprofitable overall. On the positive side, Copiers, Paper, and Accessories carry the highest margins (37–44%) and are strong candidates for promotion.

3. Top Products

The Canon imageCLASS 2200 Advanced Copier is the single highest-grossing product at \$61.6K, more than double the next closest item. Office equipment (binding systems, copiers, printers) dominates the top-10 list, reinforcing that high-ticket Technology and Office Supplies items are the primary revenue anchors.

4. Discounting Impact

Discount level is negatively correlated with profit (correlation coefficient: -0.22). Orders discounted at 30% or more (1,393 orders, ~14% of all line items) return an **average loss of -\$97 per order**. This pattern lines up closely with the Furniture category, where Tables and Bookcases carry the deepest average discounts — recommend capping discounts on structurally low-margin sub-categories.

5. Regional Performance

West (\$725K revenue, \$108K profit) and East (\$679K revenue, \$92K profit) are FreshMart's strongest regions, together contributing 61% of total revenue. South, while smallest in revenue (\$392K), posts a healthy profit margin (11.9%) — close to Central's despite Central generating 28% more revenue, suggesting Central has room to improve operational or discount efficiency.

Region	Revenue	Profit	Margin %
West	\$725,458	\$108,418	14.9%
East	\$678,781	\$91,523	13.5%
Central	\$501,240	\$39,706	7.9%
South	\$391,722	\$46,749	11.9%

Top Cities by Revenue

City	Revenue
New York City	\$256,368
Los Angeles	\$175,851
Seattle	\$119,541
San Francisco	\$112,669
Philadelphia	\$109,077
Houston	\$64,505

6. Customer Segments

Customer Segment Share of Revenue

The Consumer segment leads on every metric: \$1.16M revenue (50.6% of total), \$134K profit, and 2,586 orders — nearly double Corporate's order count. Corporate (\$706K revenue, 13.0% margin) and Home Office (\$430K revenue, 14.0% margin) are smaller but slightly more profitable per dollar of revenue than Consumer (11.6% margin), indicating an opportunity to grow these two segments without sacrificing profitability.

7. Key Recommendations

- Review discount policy on Tables and Bookcases — both are structurally loss-making; consider a discount ceiling (e.g. max 15–20%) on these sub-categories.
 - Double down on Technology and Office Supplies marketing, which combine strong revenue with healthy 17%+ margins.
 - Investigate Central region's lower margin (7.9%) relative to revenue size — likely a discounting or cost issue worth a dedicated review.
 - Grow Corporate and Home Office segments through targeted offers; they are smaller but carry better margins than Consumer.
 - Use the interactive dashboard filters (Year / Region / Category / Segment) to monitor these trends monthly going forward.
-
